May 4, 2015

The Honorable Ron Johnson Chairman Committee on Homeland Security and Governmental Affairs United States Senate Washington, DC 20510 The Honorable Tom Carper Ranking Member Committee on Homeland Security and Governmental Affairs United States Senate Washington, DC 20510

Dear Chairman Johnson and Ranking Member Carper:

The undersigned groups strongly support S. 280, the "Federal Permitting Improvement Act of 2015," and urge the Committee to report it favorably to the full Senate as soon as practicable. This critical piece of legislation would provide a streamlined process for developers to obtain environmental permits and approvals for their projects in a timely and efficient manner, allowing jobs to be created and the economy to grow.

Every year that major projects are stalled or cancelled because of a dysfunctional permitting process and a system that allows limitless challenges by opponents of development, millions of jobs are not created. For example, 351 stalled energy projects reviewed in one 2010 study had a total economic value of over \$1 trillion and represented 1.9 million American jobs that were not created.

The Federal Permitting Improvement Act of 2015 would improve the environmental review and permitting process by:

- Coordinating responsibilities among multiple agencies involved in environmental reviews to ensure that "the trains run on time;"
- Providing for concurrent reviews by agencies, rather than serial reviews;
- Allowing state-level environmental reviews to be used where the state has done a competent job, thereby avoiding needless duplication of state work by federal reviewers;
- Requiring that agencies involve themselves in the process early and comment early, avoiding eleventh-hour objections that can restart the entire review timetable;
- Establishing a reasonable process for determining the scope of project alternatives, so that the environmental review does not devolve into an endless quest to evaluate infeasible alternatives;
- Creating an online "dashboard" to track projects during the environmental review and permitting process; and
- Reducing the statute of limitations to challenge an environmental review under NEPA from six years to 150 days.

S. 280 is a practical, industry-wide approach that builds on successful provisions for environmental review management found in the Moving Ahead for Progress in the 21st Century

Act (MAP-21), Section 6002 of the Safe, Accountable, Flexible, Efficient Transportation Act: A Legacy for Users (SAFETEA-LU), and Section 1609 of the American Recovery and Reinvestment Act. The Federal Permitting Improvement Act of 2015 also embodies the procedural improvements to the environmental review process repeatedly called for by the Obama administration.

This bill would address the problem far too many projects face today: lengthy project delays from endless environmental reviews and challenges resulting in lost opportunities to create jobs and grow the economy. Every year of delay results in millions of jobs not created. The creation of millions of jobs is worth ensuring that our government works faster and more efficiently.

The undersigned groups strongly support S. 280, the "Federal Permitting Improvement Act of 2015," and encourage you to support this bill during the Homeland Security and Governmental Affairs Committee's markup of this bill.

Sincerely,
